09th of November
Physical meetings

Sm@RT

OBJECTIVES

To disseminate and share knowledge about the use of technologies in a peer-to-peer setting. The target of participants was mostly composed by farmers, advisers, consultants, technicians.

ORGANISATION AND ATTENDEES

The Training Day has been held face to face in the Innovative farm – Sebők Family Farm. The demonstration event took about 2 hours. It was conducted on the farm equipped with digital tools (EID stick reader, Gallagher system, Mixing and feeding wagon). The famers had a demo of the tools and were allowed to ask questions.

HUNGARY: MEAT SHEEP

Date and place of the NWS 5:

Thursday 9th November 2023, 10:00 am to 4:00 pm, face to face training day meeting at Sebők Family Farm, and the workshop session were in Déryné Cultural Center and Library, which locate in the middle of the village.

Present:

Number of participants: 35 person

Annex - Signing Sheet .pdf file

Organisation:

The group started together from the University of Debrecen with a minivan. During the travel the participants introduced themselves. When the group arrived in Törtel, Renáta Klein (NF) started the paperwork with a registration and welcomed the guests who's arrived directly to Törtel.

János Oláh (head of the project in Hungary) welcomed all participants and invited everyone to have a picture close to the banner of the Sm@rt project. Renáta gave everybody the questionnaire before the demonstration. During that Dr. János Oláh talked about the project's aims, evaluation and the work that we did. After that Máté Minárovics (Innovative farmer) started to speak. He spoke about the story of the farm, the system of the breeding and also the Tech. They talked about why he bought the Gallagher system, which function what he use in it. Why is it good for the farm and him.

There were 3 different tech in the Farm:

- Gallagher System (EID Stick reader, and head)
- Scale with Gallagher tech
- Strauttman Mixer and Feeder wagon

The participants have a couple of question directly to the farmer.

After the Gallagher presentation Mihály Sebők Junior showed the Mixer and feeder wagon. The participants asked a lot of question about the feed in there.

After the training session Renáta gave the second questionnaire to the participants (Annex - Results is .xlsx file)

After the training session the participants were invited to lunch in the Déryné Cultural Center and Library, which locate in the middle of the village.

During lunch the participants discussed main advantages and disadvantages about these technologies.

After lunch we had the workshop session.

Renáta Klein made a presentation about the Project in general, about the Cross Benefit Analysis the techs, and after that the Norwegian Trip. The Innovative Farmer was the part of the Hungarian delegation in Norway. They shared his experiences too.

Solutions presented / tested and feedback:
